

You need it right. You need it right now. We get it. Contact H&M NetWorks

Data NOW Data TOMORROW

H&M NetWorks will help you meet demands for reliability, redundancy, and disaster recovery. Higher speed, more processing, and greater storage capacity is the order of the day. We will help you plan and build new facilities or significantly upgrade existing sites. Our goal is to optimize data centers — not only to accommodate more hardware, but also to meet such business objectives as:

- **Reduced operating costs**
- **Increased capacity and productivity**
- **Tech-driven business processes**
- **Minimized downtime**
- **Improved security**
- **Incorporation of Green initiatives**

H&M NetWorks provides expertise to assist in the evaluation, design, and implementation of location, facility, and IT infrastructure you need.

Data Center Strategy – helps you identify requirements, capabilities, and capacities, and define your best Green and high-resiliency options.

IT Facilities Assessment, Design, and Construction Services – helps you create stable, security rich, and forward-thinking data centers.

IT Facilities Consolidation and Relocation Services – helps you make the optimal investments that deliver availability, scalability, recoverability, and agility throughout your data center transition.

H&M NetWorks' ever expanding selection of services supports the transition to reliable, secure, IT infrastructure designed to meet your ever expanding needs.

Data Center Strategy Group

- Survey current site capabilities
